HONORORO, SEPTEMBER 6TH, 1894.

Now that the plague has been successfully stamped out and the resimption by the Crown of the district in which the disease was most virulent has been decided upon, the question of how the " little bill " is to be defrayed presents itself for consideration The amount at debit of the plague account already exceeds \$100,000, the resumption of Taipingshau is estimated to cost \$750,000. and the improvement of the sanitary service of the Colony now recognised as imperative enanot be effected without a substantial addition to the appual charges. The \$750,000 to be expended in the resump- of serving either one country or the other in tion of Taipingshan may be regarded as an investment, but whether the capital will ever be recovered, not to sneak of any interest being carned, is problematical depending as it does upon what is done with the property after resumption. If the idea of total dem lition and the laying out of the district entirely afresh be carried out the \$750,000 muy b-looked upon as a wholly unremmerative investment from a pecusiary point of view, for the price at which the land can be subsequently sold will probably not be more than sufficient to defray the cost of the extensive scheme of Tevelling and terracing in contemplation, the re-making of the streets, and the re-draining of the arrea. on the oth r hand a less sweeping measure be decided upon, the better class of property being allowed to remain and the general laying out of the area not being interfered with, a considerable portion of the sum paid by the Orowa for resumption will be recovered, though probably fur from the whole of it, for it is generally recognised that land in Taipingshan will never be so valuable in the future us i has been in the past, and the cost of pulling down or otherwise destroying whatever houses it may be deemed personer to remove will necessarily be a dead loss. Bu whatever the treatment ultimately decided upon for the condemned area, the Government will have to resort to horrowing order to finance the scheme, and although the loan may ultimately be partly ropaid from the proceeds of the side of the resumed property it is clear that for some years the Culony will have to pay a considerable sum in interest. Taking all things into consideration, the \$100,000 already speut in stamping out the plague, the cost of the improved staitury measures in contemplation, and the interest on the loan that will have to be contracted, the annual mated at a lower figure buan \$50,000.

BILL TO THE EDITOR OF THE "DAILY PRESS." Sig. In his appear in the Logislative Counil on Manday the Acting Attorney-General is reported to have said :- There seems to be some misupp cheasion with regard to the money paid icto Court. It has been stated that after money is puid into Court all increment of that fund, until special application is made to the Court, is beaccorded to the Government. There is no such intention in the Ordinance, which expressly provides that it shall be carried to the specific count and if those monies earn any income or interest. I apprehend that the money thus earned will band ed to the same account us that on which the principal stands."

This, so far as it goes, is reassuring, but it not in accordance with the established practice of the supreme Const of Hongkong. The question arose some years ago whether the beneficiaries were outified to the interest which had been earned by the Government on a sum of about \$17,000 which had been in Court for several years and as to which there had been be request for intestment. The Registrar of the Court reported as follows :--

"No interest on such same has ever been allowed. These sums are paid into the general occount and are all as it were smalgamated: the T' a amounts may be large one day and much smaller saloos, and, on the prometad dank, a very large fact that the Japanese do not propose to blockade the next. PROBUNCIATION. An Anglo-Chinese Dictionary, published at the Daily Press Office, Hongkong, For comprehensiveness and practical service this Work stands unrivalled. All the new words which the Chinese have of later ears been compelled to coin to express the numerous of leets in machinery, photography, telegraphy of foreign relations has imposed upon them, are here given in estenio. Each and every word is fully illustrated and explained, forming exercise for students of a most instructive nature. Both the Court and Punti pronunciations are given the accents being carefully marked on the best principle hitherto stained. The typography displays the success of an attempt to make the Chinese and English type correspond in the size of hody, thereby affecting a vast economy of space, achieving a clearness not previously attained, and dispensing with those vast margins and vacant spaces which have heretofore characterized Chinese publications.

To illustrate the vast scope of the work the following fasts are submitted for consideration: Chalmers Vocabulary contains about 16,000 Chinese pharacters and Medburst's English ters. Again, despite all the grammars and other elementary works as yet published, the student of this difficult language absolutely re-30. Loveon, Dr. Bes quires examples to display the various applihave one general meaning. Of these examples 85-Dairy Form Co., 36 - Mount Austin Hold this work contains more than five times as many as any other Dictionary bitherto pub-For practical purposes the arrangement of the work is so complete, that a reference to its pages enables a person who understands English to communicate effectively with astives who understand nothing but Chinese . In this respect the work will be found indispensable to all Europeans residing in China, and to the natives. themselves it explains subjects fully with which To parties resident in England and interested China it mannot but be invaluable occasion-
